Back End Controller

For AMF 82-70 MP Chassis, 5-Board and Converted Chassis

#400253 **\$189.50 (2-lane unit)**

Prevents Pin Waterfall Effect: The ZOT Unit will turn off the back-end motor (distributor): when a pin-jam occurs in any position of the shuttle.

Mechanics Alert Indicator: A LED signals when the ZOT unit stops the distributor and back-end motor. The back-end motor will be turned off when (1) a pin jam occurs (e.g., when more than one pin is placed in any position on the shuttle), (2) when the Pinspotter has been idle for more than a preset number of minutes.

Prevents Damage: The ZOT product reduces damage to Pinspotter parts (e.g., distributor drive shaft parts) and to pins: by switching off the back-end motor.

Saves Wear & Tear and Reduces Power Consumption: An adjustable Time-Out can be set on a DIP Switch to stop the back-end motor: in a range of 3 to 6 minutes.

Self Restart: When the back-end motor has timed out (turned off) it will turn back on automatically immediately when a ball contacts the pit cushion.

Manual Restart: When the back-end motor has been turned off by a pin-jam, the distributor will turn on automatically when the pins have been cleared from the shuttle.

Mask Light Bulb Replacement

"Replace incandescent bulbs with LED's"

#400265 Red LED (12-Volts) for centers with AMF Pinspotters: **\$13.90 each**

#400261 Red LED (24-Volts) for centers with Brunswick Pinsetters: **\$13.90 each**

ZOT has made improvements to the LED replacements for incandescent light bulbs on Mask units. The new LED's are RED (when lit), which yields a "greater degree of brightness" in typical bowling center lighting.

The Effective Life of the product is 100 times longer than the bulbs they replace. That's a life expectancy of 100,000 hours of run time.

Power Saving: LED's use less than 1/10th of the power used with incandescent bulbs.

They are easy to install: Simply push and turn, just like the old bulb.

Mask Light Conversion Kit

#400262\$22.95

- **Stop Constant Replacement:** of older technology incandescent lamps. #90, #94, #624, #1692 and #68 lamps are rated to last 750 hours. LED Technology will run for 100-thousand hours — that's a life expectancy that's more than 100-times longer
- **Discard Aging and Worn Sockets:** remove problem sockets, obsolete worn contacts and aging wires.
- **Simple Mounting:** easy drill & screw LED & Lens system to the front of the mask unit.
- **Saves Power:** The LED Light uses less than 1/10th of the power (current) than the old #90 incandescent lamp.
- **Optional Wire Replacement:** easy screw /wire connection at the LED PC Board enables you to connect with a 6" jump-wire, or you can replace the complete run using your own wire.

NEW Replacement Parts for CTI/ZOT Ultra Chassis

For all 2-Board Chassis

- ① **Driver Board** #431070.....\$369.50
- ② **MPU Board** #431069.....\$221.50
- ③ **Transformer 115v** #400231.....\$116.80
- ④ **Fan Assembly** #400249.....\$29.95
- ⑤ **Resettable Breakers**
 - #220040 12-AMP\$14.50
 - #220039 10-AMP\$14.50
 - #220016 2-AMP.....\$14.95
 - #220038 1-AMP\$14.95

Replacement Fuses for Ultra 98 & Ultra 98 Plus

- #220022 15-AMP.....\$2.35
- #220023 1.5-AMP.....\$2.25
- #220009 10-AMP\$2.35
