A Solid-State replacement chassis with controls that mount separately or remotely.

*With All New
"OSHA Friendly"
Safety Features*

Includes all the same great features of ZOT's Ultra Air and More — see below and facing page

Fan Assembly

“The most Reliable and Safest solid-state chassis for an AMF 82-70 ever built.”

Safer Control Location: OSHA is recommending that the Pinpotters' power is locked out when the mechanic is on the machine. ZOT has addressed this issue with its new chassis, by mounting the controls on the rear of the machine.

Safer Mask Switch: the Mask Switch has been reassigned as a “Kill” Switch (making the Pinspotter stop immediately). The Chassis then requires a Reset in order to continue.
